KAPHA BIO PRODUCT BETA TEST · FEMALE WELLNESS

# PARTICIPANT PROTOCOL

7 days of product use · 9 days total

## FIRST THINGS FIRST: THANK YOU!

Thank you for helping test Kapha Bio's new vaginal suppository. Our technology is inspired by **mucin**, the body's natural protective coating. It's designed to support the vagina's healthy microbiome while helping relieve unwanted vaginal symptoms.

Your participation is an important step in bringing this product to the many women who need it. We're incredibly grateful for your time and support.

## AT A GLANCE

**WHAT YOU'LL DO**

- **Use a suppository 2× a day** (morning and evening) for 7 days
- **Fill out short surveys** about your symptoms
- **Take a vaginal swab** at the start (Day 1) and end (Day 8)
- **Mail your swabs back** (prepaid label provided)

**WHAT YOU GET**

- 🧴 Free product
- 🧫 Your own personalized microbiome report
- 🥰 Possible relief from your symptoms

**QUESTIONS? CONTACT MADDIE**

**Maddie Krieger** · Beta Testing Program Coordinator
mkrieger@kaphabio.com · **541-510-3128** (texting is fine for anything urgent)

**Need to stop early?** Please contact Maddie **before** or right after you stop using the product. We'll send a short early-exit survey. Your feedback still counts!

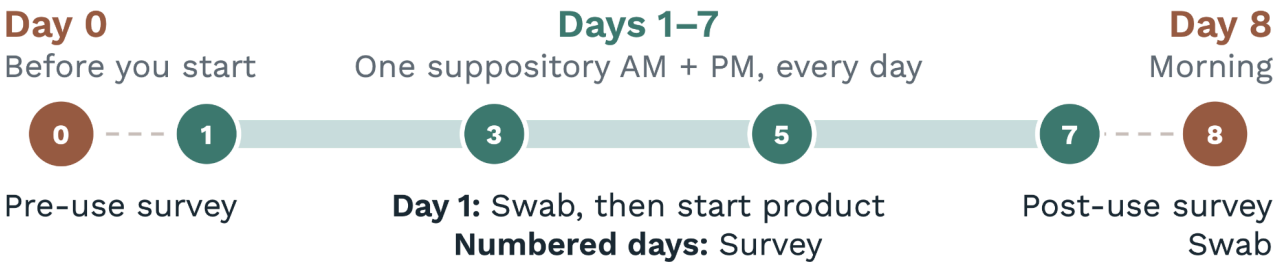

## WHAT'S IN YOUR KIT

- **16 vaginal suppositories** (you need 14; 2 are spares)
- **3 microbiome swabs** (you need 2; one is a spare)

## BEFORE YOU BEGIN

- **Plan around your period.** Pick 7 days when you won't be menstruating. The suppository isn't meant to be used during your period.
- **No other vaginal products** during the test.
- **Missed a dose or a day?** Let Maddie know and keep going on schedule.
- This is an investigational product, not an FDA approved treatment.

## YOUR SCHEDULE

Use the links below to open each survey.

**Day 1:** take your swab **before** your first suppository.

| DAY | PRODUCT | SWAB (AM) | SURVEY |
|---|---|---|---|
| **Day 0** before | **Get ready** | | **Pre-use survey** |
| **Day 1** | Morning + evening | **✓ Swab** | **Perception survey** |
| **Day 2** | Morning + evening | | — |
| **Day 3** | Morning + evening | | **Perception survey** |
| **Day 4** | Morning + evening | | — |
| **Day 5** | Morning + evening | | **Perception survey** |
| **Day 6** | Morning + evening | | — |
| **Day 7** | Morning + evening | | **Perception survey** |
| **Day 8** AM | **Done!** | **✓ Swab** | **Post-use survey** |

# STEP-BY-STEP INSTRUCTIONS

## Take your vaginal swab **DAYS 1 & 8 · MORNING**

> **Swab in the morning.** On Day 1, do this **before** your first suppository.

1. Open the package. Hold the swab **by the end of the handle only**. Don't touch the spongy tip.
2. Insert the swab into your vagina and move it in a **circular motion for 30 seconds**, then remove it.
3. Open the tube with your free hand and put the swab tip inside without touching anything else.
4. **Snap the handle** at the score line and screw the cap on tightly.
5. **Label the tube** with the date, your last name, and **"Start"** (Day 1) or **"End"** (Day 8).
6. Store at **room temperature** until the test is over. We'll send a prepaid label and shipping instructions.

## Insert the suppository **MORNING + EVENING · DAYS 1–7**

A vaginal suppository is a small solid capsule that dissolves inside the vagina.

**Pick a comfortable position,** whichever gives you the most control:

- Lying on your back with your knees bent
- Standing with one foot up on a toilet seat or chair
- Squatting

1. Wash your hands.
2. Hold the suppository between your **thumb and index finger**.
3. **Gently insert** it into the vaginal opening.
4. Push it in about **1–2 inches** (2.5–5 cm), until it feels secure and comfortable.
5. **Wash your hands again** with soap and warm water.

> **DAY 8: YOU MADE IT!**
> Take your final swab in the morning, then fill out the **Post-use survey**. Keep both swab tubes at room temperature. We'll be in touch about mailing them back.
