KAPHA BIO BETA TEST · ORAL CARE

# PARTICIPANT PROTOCOL

2 days of product use · 4 days total

## FIRST THINGS FIRST: THANK YOU!

Thank you for helping test Kapha Bio's new oral spray. Our technology is inspired by **mucin**, the body's natural protective coating. It's designed to support your mouth's healthy microbiome while relieving the symptoms of dry mouth.

Your participation is an important step in bringing this product to the many people who need it. We're incredibly grateful for your time and support.

## AT A GLANCE

**WHAT YOU'LL DO**

- **Mix the spray** once, the day before you start
- **Use the spray 3× a day** (morning, afternoon, and evening) for 2 days
- **Fill out short surveys** about your symptoms
- **Give a saliva sample** at the start (Day 1) and end (Day 3)
- **Mail your samples back** (prepaid label provided)

**WHAT YOU GET**

- 🧴 Free product
- 🧫 Your own personalized microbiome report
- 🥰 Possible relief from your symptoms

**QUESTIONS? CONTACT MADDIE**

**Maddie Krieger** · Beta Testing Program Coordinator
mkrieger@kaphabio.com · **541-510-3128** (texting is fine for anything urgent)

**Need to stop early?** Please contact Maddie **before** or right after you stop using the product. We'll send a short early-exit survey. Your feedback still counts!

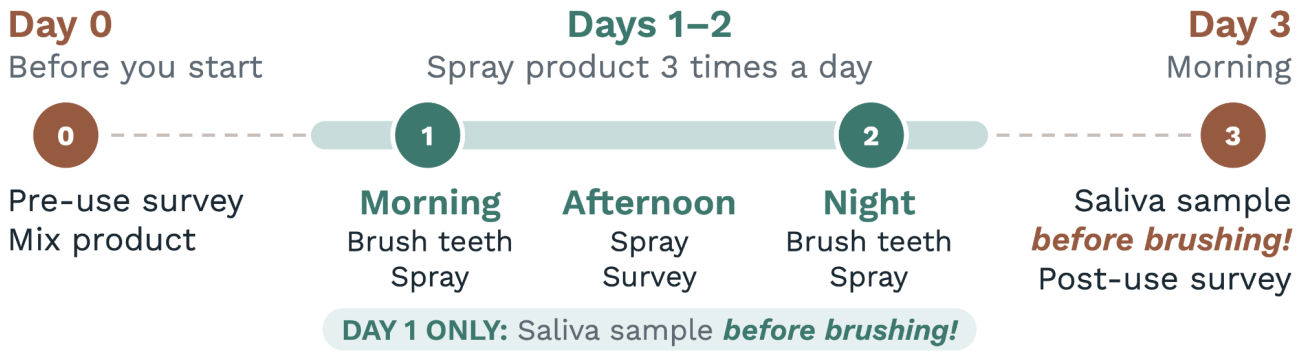

## WHAT'S IN YOUR KIT

- **Product powder** (labeled "mucin") in a tube
- **Water** in a tube
- **Spray bottle** (empty) and a **small funnel**
- **2 saliva collection tubes**

## BEFORE YOU BEGIN

- **No other dry mouth treatments** during the test.
- **Keep the spray in the fridge** between uses.
- **Missed a dose or a day?** Let Maddie know and keep going on schedule.
- **This is an investigational product,** not an FDA-approved treatment.

## YOUR SCHEDULE

Use the links below to open each survey.

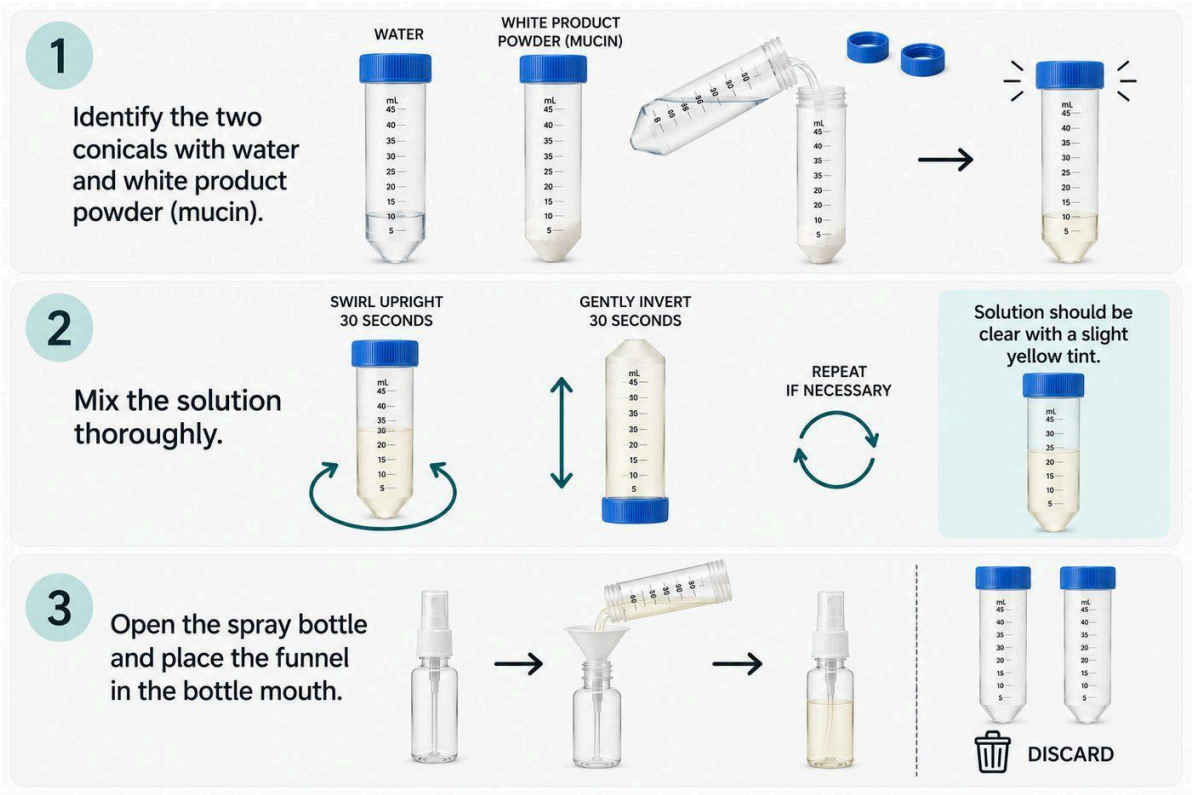

**Day 1:** Take your saliva sample **before** your first spray.

| DAY | PRODUCT | SALIVA (AM) | SURVEY |
|---|---|---|---|
| Day 0 before | **Mix the product** | | Pre-use survey |
| Day 1 | Morning, afternoon + evening | ✓ Saliva | Perception survey |
| Day 2 | Morning, afternoon + evening | | Perception survey |
| Day 3 AM | **Done!** | ✓ Saliva | Post-use survey |

# STEP-BY-STEP INSTRUCTIONS

## Mix the product **DAY 0 · ONCE**

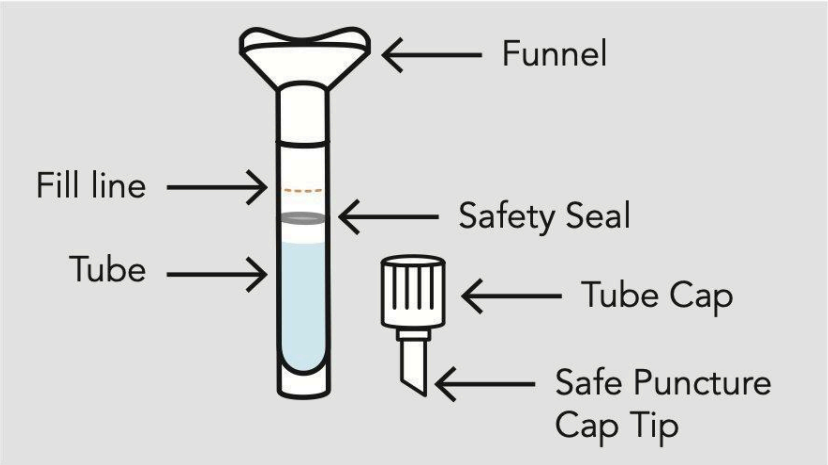

1. Pour the **water** into the tube with the **white powder**. Cap it tightly.
2. **Swirl** upright for 30 seconds, then gently **turn upside down** for 30 seconds. Repeat if needed. Go gently to avoid foam.
3. Check it: the solution should be **clear with a slight yellow tint**.
4. Put the **funnel** in the spray bottle and pour in all the solution. Cap the bottle. Throw away both empty tubes and the funnel.
5. **Store in the fridge.**

## Take a saliva sample **DAYS 1 & 3 · MORNING**

> **Collect first thing in the morning,** before brushing your teeth, eating, or drinking anything. On Day 1, do this **before** your first spray.

1. Open the tube package and **twist the funnel** onto the top of the tube.
2. Hold the tube upright and **spit into the funnel**. Repeat until the liquid saliva (not foam) reaches the **fill line**.
3. Keeping the tube upright, **twist off the funnel** and throw it away.
4. **Press and turn the cap** to close the tube tightly. Turn it upside down for 10 seconds, then shake it hard a few times.
5. **Label the tube** with the date, your last name, and **“Start”** (Day 1) or **“End”** (Day 3).
6. Store at **room temperature** until the test is over. We’ll send a prepaid label and shipping instructions.

## Use the spray 3× A DAY · DAYS 1–2

Use it in the **morning, afternoon, and evening** on Days 1 and 2.

1. Brushing your teeth around this time? **Brush first**, then spray.
2. **Gently swirl** the bottle to mix.
3. Use **10 sprays** to cover your whole mouth: your front, left, and right teeth and gums, plus the left and right sides of your mouth, on both the top and bottom.
4. Spread the product around your mouth, then **spit out any extra** into the sink. Don't swallow it.
5. **Don't eat or drink for 30 minutes.**
6. Put the bottle **back in the fridge**.

**DAY 3: YOU MADE IT!**

Give your final saliva sample in the morning, then fill out the **Post-use survey**. Keep both tubes at room temperature. We'll be in touch about mailing them back.
